Department of Pharmacy

Laboratory investigations in hemostasis and thromboinflammation

Development, validation and implementation of new laboratory diagnostic tools for the evaluation of thrombotic and bleeding disorders

# Research group: Jonathan DOUXFILS

- Development of in-vitro diagnostic test for hemostasis investigation
- Development of cell-based model for the characterization of the interplay between coagulation, inflammation and immunity
- In-vitro evaluation of drug and vaccine efficacy
- Clinical study management and monitoring

# Research group: Jonathan DOUXFILS

## **Group leader**

Jonathan Doux fils

## **Advanced researchers**

Hélène Haguet

Romain Siriez

## **PhD students**

Laure Morimont

Jonathan Evrard

Julien Favresse (Clinique Saint-Luc Bouge)

Constant Gillot

Marie Didembourg

Julie Vassart

Jonathan Decarpentrie
