

## Dynamics of membranes and endocytosis

Unconventional endocytosis and its pathophysiological functions: unravelling the molecular mechanisms for their exploitation as pharmacological targets in cancer

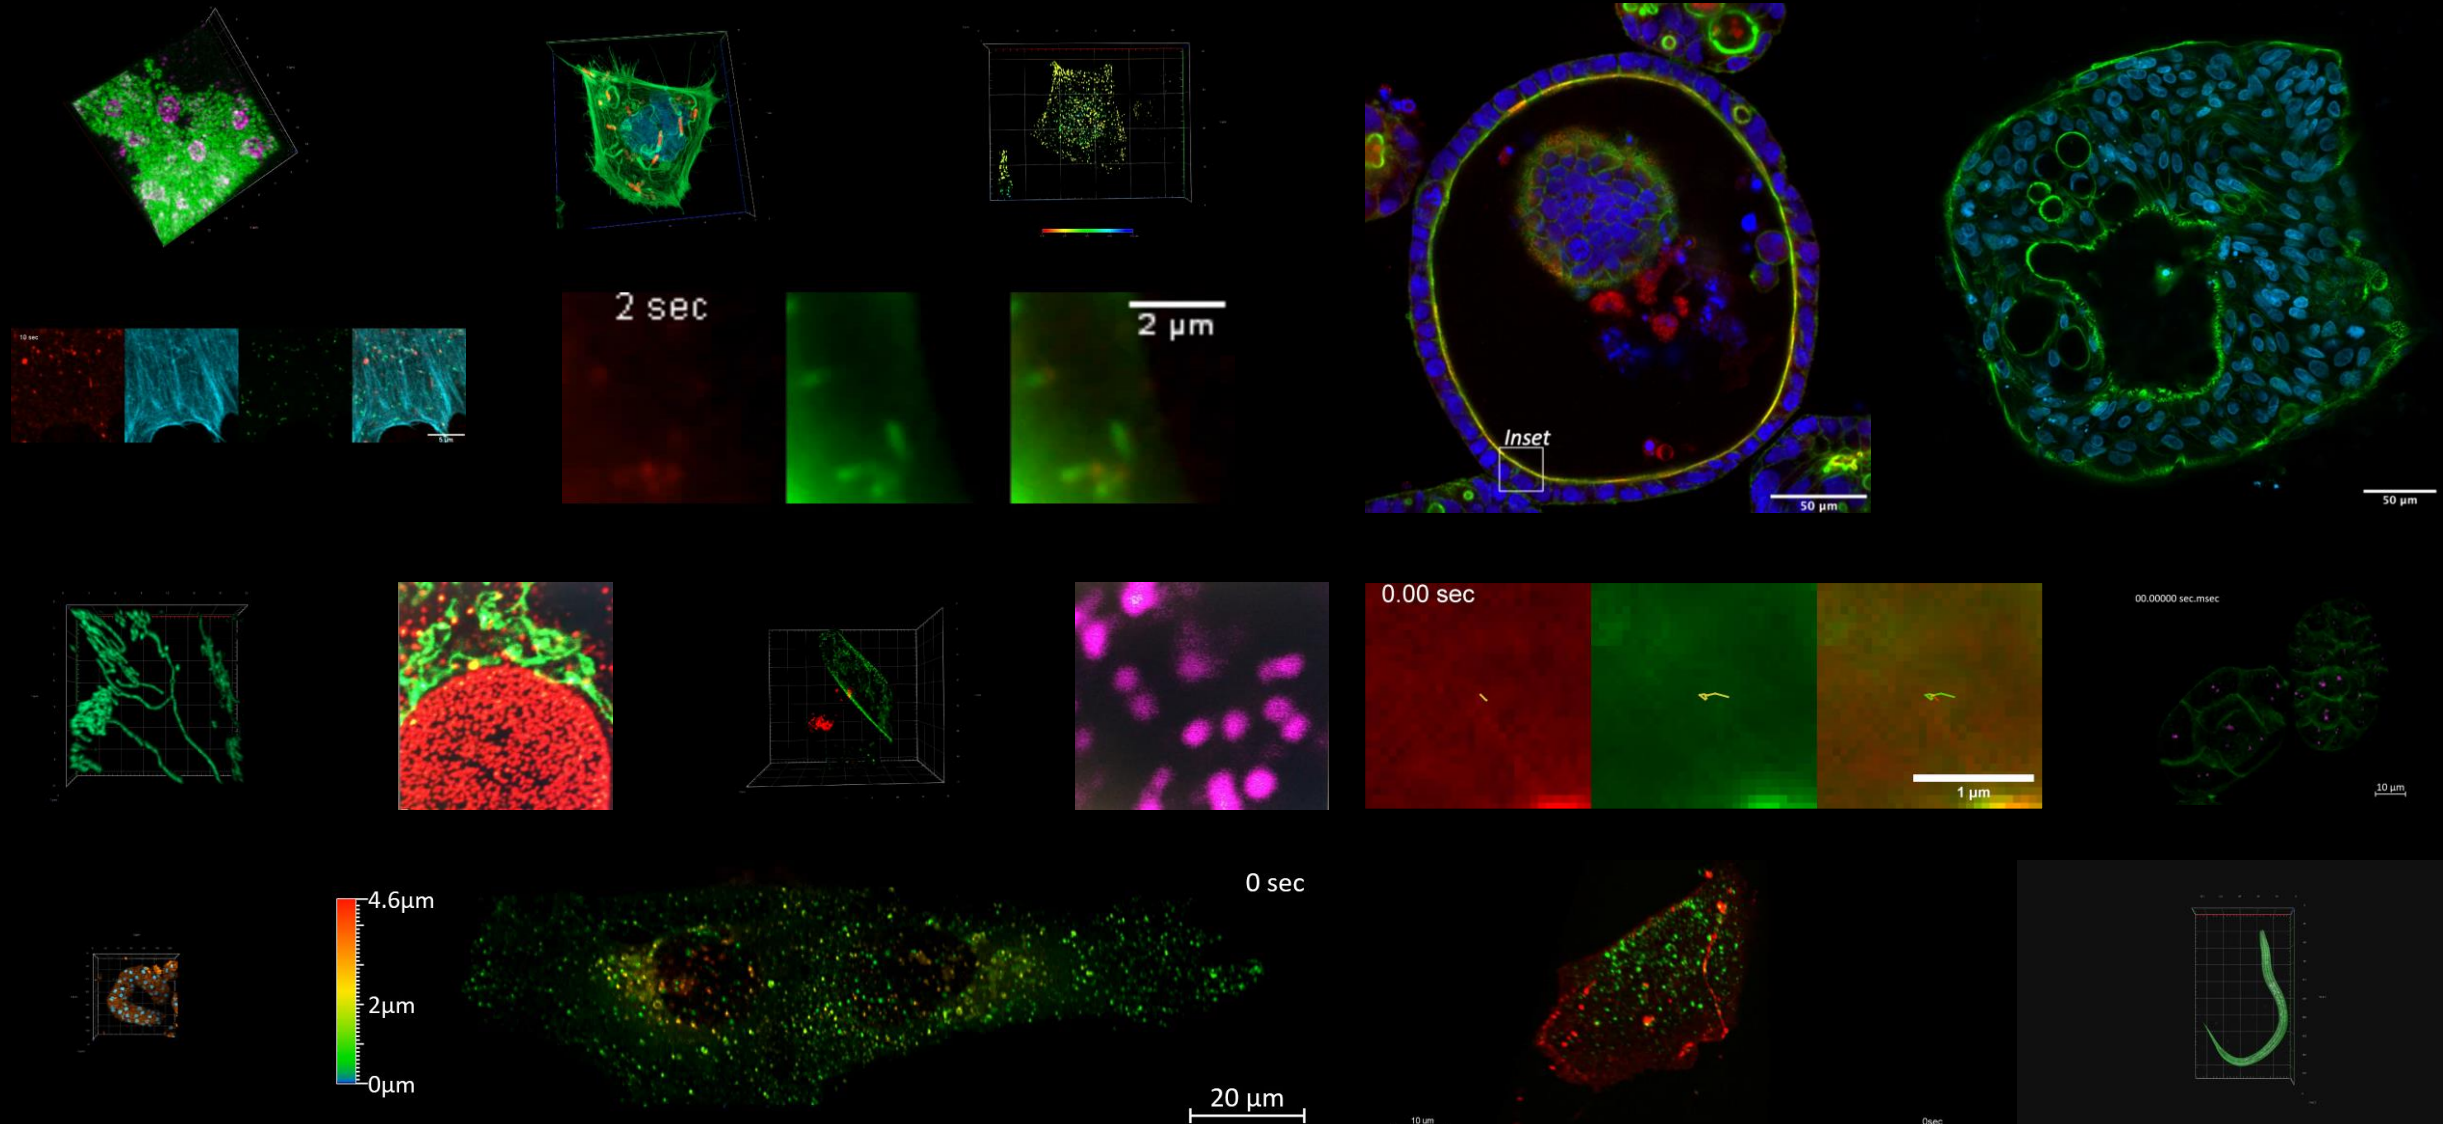

Laboratory of Cellular and  
Molecular Biology  
(URBC)

# Research group: Henri-François RENARD

Live cell imaging to study dynamic molecular events

# Research group: Henri-François RENARD

## Group leader

Henri-François Renard

## Postdoc

François Tyckaert

Natacha Zanin

## PhD students

Emilie Rigaux

Shiqiang Xu

## Master students

Clémence D'Hulst

Amandine Fondaire
